Report of Semminar on "Trends and Developments of Intellectual Property Rights"

Topic of the seminar: Intellectual Property Rights "Trends and Developments of Intellectual Property Rights"

Speaker: Dr. Suryakant B. Patil, Principal Consultant, PSP-IP Associate Pvt.Ltd.

No. Of participants: -74

Date of the seminar: - 15-03-2018

About the seminar:

One day Seminar on 'Intellectual Property Rights "Trends and Developments of Intellectual Property Rights"' was organized 4th January, 2014 by the IPR Cell of the Ish&em School of technology, at Seminar Hall. Seminar entailed of expert lectures, career talks, group discussions, and project idea presentations on different topics under Intellectual Property Rights. This is an event where Researcher, Industry & Academia got together to discuss the problems and opportunities for overall with respect to Intellectual Property Rights. Whole event guided by the Dr. Suryakant B. Patil, and the event was coordinated by Mr. Vinay Themke, Assistant Professor, Ish&em School of Technology, Pune. The event started with the welcome address of Dr. Suryakant B. Patil. He explained the rational and aim of the seminar. He was introduced all the title and speaker of the lecture. Many faculty members, and 74 students. The students were actively joined and involved in the question answer session of every session.

This lecture was initiated by indicating the connotation of the terminologies – IP and IPR. The legal basis of IPR and then various forms were discussed. The ethos and process vs product patents, trade secrete protection, designs, copyrights etc., and the basis of the expectance of various IPR. Problems were discussed the types of patents such as biotech patent, plant patent, utility patent, software patent, business method patent, nano-tech patent, design pattern were elaborated. The wealth of patents in developed countries like USA, Japan and Europe are projected and compared with Indian status indicating poorness with the wealth of IP in India, a focus of the important of commercialization of patents was projected.

OutCome: The faculty and staff get preliminary idea about Trends and Developments of Intellectual Property Rights.

Report of Seminar on "Intellectual Property Rights"

Topic of the seminar: Intellectual Property Rights

Speaker: Dr Abhigyanam, Director, Indeyes, Bhopal.

No. Of participants: - 80

Date of the seminar: - 12-09-2017

About the seminar:

One day Seminar on "Intellectual Property Rights" was organized 12th September, 2017 by the IPR Cell of the Isbm School of technology, at Seminar Hall. Dr Abhigyanam introduced the concept of Intellectual Property (IP) in the contemporary digitalized world. The different types of IP were elaborated upon, thus bringing in the question of Intellectual Property Rights, which can and must be exercised. When tying the knot with the industry for tangible reward based utilisation of new ideas, a prior awareness and knowledge of IPR is sine qua non. Finally, the lights were upon how the academia can indoctrinate local artisans into the productive market possibilities by instructing these groups about IP & IPR. Whole event guided by the Prof. Dr Abhigyanam, and the event was coordinated by Mr. Sitaram Logani, Assistant Professor, Isb&M School of Technology, Pune. The event started with the welcome address of Dr Abhigyanam. He was introduced all the title and speaker of the lecture. Many faculty members, and 80 students were present to the seminar. The students were actively joined and involved in the question answer session of every session. This conference was focused on various issues of the IPR. Dr Abhigyanam shared his experience with participants under the title "Intellectual Property Rights".

Out come: The faculty and student were happy with this copious inflow of details enriching their rudimentary awareness about IP & IPR. Students get empowered with potential for innovation; meaningfully motivating them towards a reward based window.

Report of seminar on Seminar On "Enforcement Of Intellectual Property Rights"

Topic of the seminar: Intellectual Property Rights "Seminar On Enforcement Of Intellectual Property Rights"

Speaker: Dr. Bharati Pawar, Asst. Professor, Isb&m School of Technology, Pune.

No. Of participants: - 68

Date of the seminar: - 28-01-2017

About the seminar:

The seminar was inaugurated by a welcoming note delivered by the Assistant Professor Aniruddh Bulbule of Isb&m School of Technology, Pune who outlined the importance of the seminar which aimed to update law enforcement authorities on the ongoing developments in the ever-changing field of IP. The seminar also intended to build new bridges of communication among the participating countries and strengthen existing cooperation in combating IP crime, as well as all other types of crime. Mr. Bulbule welcomed the participants to the seminar, which was attended by a total of 55 participants. The objective of the Seminar was to Give a practical overview of the IP rights (IPRs)

An overview of the different types of IP was given. It was explained how trademarks protect signs used to identify the business source of products and services and could be protected forever. Designs protect the appearance and features, such as shape, configuration, texture or material of a product. The maximum term of protection was 25 years from the date of filing. Patents are granted for technical inventions. Applications for patents are examined by the patent office they are filed at, in order to determine whether they meet the stringent requirements in order for a patent to be granted. Patents generally last for a maximum of 20 years from the date of filing. Utility models offer simpler protection, for a shorter period of time, but are usually registered and published much faster, and at a lower cost, for applicants than patents. Trade secrets protect information and could include a formula, pattern, compilation, programme, device, method, technique, or process; that derives independent economic value, actual or potential, from not being generally known to or readily ascertainable through appropriate means by other persons who might obtain economic value from its disclosure or use. The protection of trade secret depends on the efforts made by the secret holder to maintain their secrecy. Copyright and related rights do not need to be registered. They automatically exist when a work is created. They protect any type of original, creative expression, including literature, art, drama, music, photographs, recordings and broadcasts. Semiconductor topography determines the exact location of each element with an electronic function within the 2

Peoples Empowerment Group

DEPARTMENT OF COMPUTER ENGINEERING
Academic Year 2016-17

integrated circuit. An integrated circuit is a set of electronic circuits on one small plate (chip) of semiconductor material, normally silicon. Integrated circuits are used in virtually all electronic equipment today and have revolutionized the world of electronics. An example of a patent was presented in the form of Michael Jackson's 'Anti-gravity illusion'. This illusion was created whereby the shoes had a specially designed heel slot which could be detachably engaged with the hitch member by simply sliding the shoe wearer's foot forward, thereby engaging with the hitch member. This allowed the wearer to lean forward, giving the illusion of defying gravity. The importance of IPRs on the economy was explained. Royalties, as an example, did not come from the sale of a song but from the reproduction of a song through radio or through transmission in a public arena. It was highlighted that legal downloads of music from the internet only represent an extremely small percentage of total downloads. It was estimated that 95% of music is downloaded illegally around the world. That percentage is as high as 98% in Spain. It was explained that IPRs are property rights that belong to their owners. Therefore, only the owners of such rights or authorized people are entitled to use and exploit them. By contrast, any use of IPRs by non-authorized people constitutes an infringement of such rights. Different kinds of use are normally prohibited: strict reproduction of the IPR, in addition to imitating, manufacturing, distributing, advertising, and importing goods bearing the IPR without authorization of the right holder. From a legal standpoint, counterfeiting and piracy must be clearly distinguished from sub-standard products. Smuggling is also legally different from counterfeiting. The issue of parallel imports was addressed.

Outcomes: student understand the full information of IPR with practical example.

Subject: Request for conducting workshop on Intellectual Property Rights "Intellectual Property Rights Awareness"

Respected Madam,

Greetings on behalf of ISB&M School of technology, Pune

We take this opportunity to invite you for conducting workshop on Intellectual Property Rights "Intellectual Property Rights Awareness" on 9th March, 2015 organized by Mechanical Department, ISB&M School of Technology, Nande, Pune-412115.

ISB&M School of technology prides itself as one of the foremost institution in Pune for studies in the field of technology. Its vision is to create a worldwide educational environment that allows students to fully develop their professional abilities and to foster a strong sense of responsibilities and ethics into them.

ISB&M School of Technology maintains a high standard of excellence in education and continuously strives to create a learning environment and develop students with leadership skills to meet stringent demand of the industry.

We would indeed be obliged if you conduct seminar on Intellectual Property Rights "Intellectual Property Rights Awareness" on 9th March 2015. Your experience and knowledge in the field of Engineering would add a great value to the knowledge of students.

Looking forward to your kind confirmation.

Thanking you with regards.

Report of Seminar on "Intellectual Property Rights Awareness"

Topic of the seminar: - Intellectual Property Rights Awareness

Speaker: Dr. Bharati Pawar, Asst. Professor, Isb&m School of Technology, Pune.

No. Of participants: - 60

Date of the seminar: - 09-03-2016

About the seminar:

In today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance. The focus of the seminar was to promote the creation, protection & enforcement of the Intellectual Property Rights amongst various stakeholders. IP has gained center stage and has attained more focus, more attention and is a subject matter of discussion between government, institutions, industries under various regimes and protocol that are put in place to ensure that the world in which we live, where knowledge and innovation are the engines of development and growth. In that world, those who have the creative minds and ability should feel assured that it betterment of other nations as done in the past. There has to be both free transfer of technology which will address the challenge of climate change and also transfer of resources to poor countries. Enforcement of IP rights is another major area which deserves serious mention in the policy. There should be effective enforcement of the IP laws so that the issues of piracy and counterfeits which results in huge losses to various industries can be mitigated. The only EOW that we have in Delhi is not sufficient enough to deal with IP crimes happening in across the country. Hence capacity building activities must be carried out with vigor to enhance the IP enforcement in the country and to make India a destination for international IP Filings. She also emphasized the dire need to shift focus on investing in knowledge based capital rather than on physical capital. Dr. Bharati Pawar, stated that networking is very much necessary in order to facilitate the process of promoting Intellectual Property and this has to be ensured by organizations like FICCI. Speaking on the history of patenting in India, Dr. Pawar mentioned that in the beginning, around 3000 - 3500 applications used to be filed but now the no. of applications filed have increased to around 43,600. She also spoke on his practical experience of filing two patent application and how he got a GI done for the famous Muga Silk of Assam.

OUT COME: The faculty, staff and Student get preliminary idea about Intellectual property rights and Patents

Report of Two day Workshop on Hands on PIC Microcontroller

Topic of the seminar: Intellectual Property Rights "Intellectual Property Rights & Patenting"

Speaker: Dr. Bharati Pawar, Asst. Professor, Isb&m School of Technology, Pune.

No. Of participants: - 52

Date of the seminar: - 08-08-2015

About the seminar:

A Seminar on "INTELLECTUAL PROPERTY RIGHTS & PATENTING" was organized 8th August, 2015 by the IPR Cell of the Isb&m School of Technology. Since the patent is playing crucial role in IPR, the seminar brings about of expert lectures, group discussions on different topics under Patent. In the seminar Industry & Academia got together to discuss the problems and opportunities for overall with respect to patent and law. Whole event guided by the Prof. (Dr.) Bharati Pawar and the event was coordinated by Mrs. Sheela Bankar. The event started with the welcome address of Prof. (Dr.) Bharati Pawar. He explained the rational and aim of the seminar. He was introduced all the title and speaker of the lecture. Many faculty members, Researchers and 52 students. The students were actively joined and involved in the question answer session of the every session. This conference was focused on various issues of the IPR. He has thrown light on the Patent, and patent system, narrated various issues of it and later on focused on the emerging issues on patent. He has discussed various points to overcome the problems. She given details of a new rights and duties of patentee. Various statutory provisions of the India and WIPO initiatives have been discussed. He spoke at length about the need of the skill, academics, and implications of patent Laws. She also explained the Importance of IPR laws and measures of the development of new small-scale industries and their organizational structure. During the special session "Interaction with students" .They got justified answers from the speakers. The interactions were very relevant and meaningful. Participants would be benefitted with this event. Dr. Bharati Pawar summarized and concluded the session followed by the introduction of the speakers.

OUT COME: student get understand the procedure for applying the patent

(57) Abstract :
Conventionally, a scissor lift or jack is used for lifting a vehicle to gain easy access underneath the vehicle. The scissor lift can be categorized as mechanical, pneumatic or hydraulic based on the lifting mechanism used in construction of lift. The calculation for the allowable maximum deflection is the primary factor in selection of the type of lift, design and analysis of a mechanical scissor lift which on the principle of a screw jack. Existing portable systems have a limitation of height. Providing more elevation would increase the efficiency of onsite servicing. The solid modeling and simulation is done using CAE software. Several linear static, FEA analyses have assured accurate results. Results coincide with manual calculations simultaneously. The result shows that the designed components of scissor lift are in the acceptable range which certifies for the manufacturing process which is done.

Report of Copyright and Intellectual Property Rights: An Overview

Topic Of The Seminar: Copyright and Intellectual Property Rights: An Overview

Speaker: Dr. Bham Pawar, Isb&m School of Technology, pune

No. Of Participants: - 32

Date Of The Seminar: - 17-01-2015

About The Seminar:

Intellectual Property Rights (IPR) that are granted to person for any creative and artistic work, for any invention or discovery, or any literary work or work, phrases and symbols or designs for a stipulated period of time. In India, Intellectual property is governed under the patents Act, 1970, Trademarks Act, 1999, Indian copyrights Act, 1957, Designs Act 2001, etc. Copyrights also is a right given by the law to the creators of literary, dramatic, musical and artistic works and producers of cinematograph films and sound recordings. It is a bundle of rights including, rights of reproduction, communication to the public, adaptation and translation of the work. Now the questions arise, how many years' copyrights are sanctioned to the creators and when it would be infringed? It is mentioned that a term of life plus sixty years is adopted in India for the purpose of determining the period of copyrights. Copyrights in a work is considered as infringed only if a substantial part is used unauthorized. Copyrights may be acquired for almost all the visible things like script, photo, book, essay films videos, architecture etc. and also intangible things such as music. The most important criteria to determine whether then said article is copyrightable or not, is based on its originality. Copyrights protect the expression and not the content or substance per se. For example, an author writes about software of library automation. Here the idea of making the software is not protected but the only the way of expressing is protected. The idea is protected under the patent law and not under copyright ACT.

Out Come: The faculty and staff get preliminary idea on copyright act and Intellectual property rights.

Report of Seminar on "Intellectual Property Rights"

Topic of the seminar: Intellectual Property Rights "Intellectual Property Rights"

Speaker: Dr. Bharati Pawar, Asst. Professor, Isb&m School of Technology, Pune.

No. Of participants: - 48

Date of the seminar: - 07-09-2013

About the seminar:

One day Seminar on "Intellectual Property Rights "Intellectual Property Rights" was organized 7 th september, 2013 by the IPR Cell of the Isb&m School of technology, at Seminar Hall. Seminar entailed of expert lectures, career talks, group discussions, and project idea presentations on different topics under Intellectual Property Rights. The Program me started with welcome note followed by speaker's felicitation. During this session the following points were discussed:

1. Introduction of Intellectual Property Rights
2. Law governing IP Meaning
2. Types of IP
 - a. Patent
 - b. Trademark
 - c. Copyright
3. Infringement
4. Case Studies
5. Conclusion

The lecture was full of knowledge as most of the faculty members were unaware of this Intellectual Property Rights procedure of filling the patents. The lecture concluded with an interactive question answer session and faculty were satisfied.

OutCome: The faculty and staff get Over all knowledge about the IPR

REPORT

Seminar On "MECHATRONICS & INDUSTRIAL AUTOMATION"

Placement Assistance Cell, ISB&M School of Technology, Nande, Pune conducted its seminar on "MECHATRONICS & INDUSTRIAL AUTOMATION" from 02:30 PM to 05:00 PM on 22nd Jan 2017. It helps the students in their academic, professional life. This seminar will definitely improve student's skill and knowledge to get job in Automation Process Industries. This seminar is aimed at giving students an actual working of industry. This seminar shall be the first step towards satisfying career in industrial sector.

Valuation of seminar:

This seminar helps students in their Academic, Professional life. At present all industries are using 100% automation in their process units. So manufacturers are looking for engineers for handling automation machine. No actual works are available in industries. Industries are recruiting mainly automation & mechatronics engineer from Electrical, Electronics, E&H and Instrumentation & Mechatrical for handling automation machines. So be an "Automation & Mechatronics Engineer". An automation is available in all process industries, in various multi multi storage buildings, Power generation and distribution plant, in shipping, docks and airports, etc. So more opportunities for getting jobs.
